PROFESSIONAL SUMMARY

Full-stack developer with 3 years of experience across professional roles and production applications, comfortable owning complete development lifecycles from system architecture to deployment. AI-first by practice, building and open-sourcing custom AI tooling, from multi-agent development workflows to automated code review pipelines, to compound team velocity as AI capabilities evolve, and winning the UQCS Hackathon for an AI application that transformed how students study. Proven track record in small-team and startup environments where wearing multiple hats is the norm, shipping fast using AI-augmented workflows. Equally comfortable leading technical decisions independently or collaborating closely with clients and cross-functional teams. Currently seeking opportunities to build user-focused applications with AI-driven approaches in fast-paced, agile environments.

EDUCATION

Bachelor of Information Technology

University of Queensland — Software Information Systems

Brisbane, Australia

Coursework: Cloud Computing, Web/Mobile Programming, Analysis & Information System Design

Bachelor of Computer Science

Universitas Indonesia

Depok, Indonesia

Teaching Assistant — Programming Foundation (Java), under Dr Lim Yohanes Stefanus

Coursework: Machine Learning & Data Science, Algorithms Design & Analysis, Software Engineering Project

WORK EXPERIENCE

Software Engineer | Distrosb

June 2026 – Present

Brisbane, QLD - Contract

- Leading mobile development transition from MVP phase (Next.js PWA) to production-ready React Native app
- Architected and integrated an AI-powered code review agent into the CI/CD pipeline, catching bugs and inconsistencies pre-merge and reducing regression risk before production deployment
- Built and open-sourced a Claude Code skill that auto-generates interactive visual flow diagrams from the codebase, cutting onboarding time and improving cross-team understanding of feature and system architecture
- Lead sprint planning and set technical direction across short and long-term development cycles.
- Investigate reported issues through Sentry and document findings for the team.
- Test and monitor releases to ensure stability for a platform supporting 500+ active users.

Tech stack: *Mobile/Web: Next.js PWA (JavaScript) · Backend: Node.js, AWS, MySQL, Redis, Firebase Auth*

Founding Engineer | Meels

Sep 2025 – Present

Melbourne, VIC (Remote) - Contract

- Architected and shipped a full-stack social video & forum platform from concept to production.
- Built a meal planning system that auto-syncs recipe ingredients into a smart shopping list with unit merging and video source tracking.
- Designed and built a brand analytics dashboard combining structured usage data (recipe volume, ingredient pairings, seasonal trends) with brand-specific context to generate LLM-powered insights and actionable partnership recommendations for FMCG brand partners.
- Built an agentic lead generation pipeline that autonomously analyses platform trend data to identify emerging ingredient opportunities, then generates tailored outreach prototypes and enriches leads with verified contact details for relevant FMCG brands

Tech stack: *Mobile: React Native/Expo (TypeScript) · Backend: Node.js/Fastify, Prisma, PostgreSQL (Supabase), Redis (Upstash) · Storage/Auth: Cloudflare R2, Firebase Auth · Web/Deploy: Next.js, Tailwind, Railway, Vercel*

Web Developer | Newish Communications

Jan 2025 – Jun 2025

Brisbane, QLD - Volunteer

- Collaborated directly with clients to gather requirements, plan website architecture, and deliver tailored solutions aligned with their goals.
- Redesigned and developed client websites with a focus on SEO optimisation, responsive layouts, and effective site flow using advanced CSS to enhance performance and usability.

Tech stack: *WordPress, HTML/CSS, JavaScript, SEO tooling*

Software Engineer | Techflouu

Jul 2024 – Mar 2025

Singapore (Remote) - Full time

- Contributed to full-stack feature development across two cross-platform mobile applications (Vigeo App and Biohackk), released on iOS and Android.
- Owned end-to-end delivery of features including habit tracking with streaks and admin views, Sendbird chat archiving, and a fitness booking management system.
- Collaborated in weekly cross-functional meetings with clients, PMs, and UX designers to clarify business goals, present deliverables, and improve workflows based on usability feedback.
- Investigated and resolved client-reported issues using Datadog; improved a critical feature's backend operation performance by up to 86% through query and flow optimisations.
- Mentored and supported interns with their day-to-day development tasks.

Tech stack: *React Native/Expo (TypeScript), Next.js, NestJS, PostgreSQL, Sendbird, Datadog, AWS*

Software Engineer Intern | Techflouu

Feb 2024 – Jul 2024

Singapore (Remote) - Intern

- Developed gamified log-tracking and period-tracking features in React Native, owning both backend architecture design and frontend implementation.
- Built scheduling and roster availability tools with Next.js, enabling clients to manage room and staff allocations efficiently.
- Improved the time complexity of an existing insert-and-sort algorithm from $O(n \log n)$ to $O(n)$.

Tech stack: *React Native/Expo (TypeScript), Next.js, Node.js, PostgreSQL*

PROJECTS

Best Overall — UQCS Hackathon 2024 (1st place, 35 teams)

- Led frontend and AI engineering for a browser extension that enhanced UQ lecture recordings with AI-generated summaries and Q&A, built in 44 hours.
- Managed team cadence under pressure by running standups every 3 hours, enabling rapid iteration across the full build.

Revamped SiAsisten — Teaching Assistant Management Platform

- Managed a 12-person team as Project Manager and Frontend Developer, delivering a full redesign using Agile methodology over four months.
- Rebuilt the Faculty of Computer Science platform for Universitas Indonesia, actively used by students, teaching assistants, and faculty across a department of 40,000+ students.

TECHNICAL SKILLS

Languages | TypeScript, JavaScript, C#, Python, Java, SQL, Kotlin

Front-end | React, Next.js, React Native (Expo), Tailwind CSS (advanced), CSS

Back-end | NestJS, Node.js, .NET, Django REST Framework, Spring Boot, Passport.js

Databases | PostgreSQL, MySQL, Firebase Firestore, Redis

Infrastructure | AWS, GCP, Docker, Kubernetes, Nginx, Cloudflare R2

Tools | Git, Datadog, Sendbird, Figma, Expo
